        Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Score

"Generation and initial analysis of more than 15,000 full-length
RT human and mouse cDNA sequences.";
"Generation other cystatins. May play a role in immune regulation
CC --- FUNCTION: Inhibits papain and cathepsin L but with affinities
CC --- SUBCELULAR LOCATION: Secreted (Probable).

C--- TISSUE SPECIFICITY: Primarily expressed in peripheral blood cells
and spleen.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Marsh V.L., Martin S.L., McConnachie L.J., McLay K., McMurray A.A., Miller S.A., Mistry D., Moore M.J.F., Mullikin J.C., Nickerson T., Oliver K., Parker A., Patel R., Pearce T.A.V., Peck A.I., Phillimore B.J.C.T., Prathalingam S.R., Plumb R.W., Ramsay H., Rice C.M., Ross M.T., Scott C.E., Sehra H.K., Shownkeen R., Sims S., Skuce C.D., Smith M.L., Soderlund C., Steward C.A., Sulston J.E., Swann R.M., Sycamore N., Taylor R., Tee tward C.A., Sulston J.E., Swann R.M., Sycamore N., Taylor R., Tee tward C.A., Steward S.A., Tromans A.C., Vaudin M., Wallis J.M., Whitehead S.L., Whittaker P., Willey D.L., Williams L., Williams S.A. submandibular gland.

DISEASE: Defects in CST3 are a cause of hereditary cerebral hemorrhage with amyloidosis (HCHWA) [MIM:105150]; also known as cerebral amyloid anglopathy (CAA) or cerebroarterial amyloidosis cerebral amyloid anglopathy (CAA) or the baracterized by a thickening of the Icelandic type. HCHWA is characterized by a thickening of the local type walls with deposition of material with the
                                                                                                                                                                                                                                                                                                                                                                                                                                                                        SUBUNIT: Homodimer.
TISSUE SPECIFICITY: Expressed in highest levels
                                                                                                                                                                                                                                             SIMILARITY: Belongs to the cystatin family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      thought to serve an important
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   regulator of this enzyme activity.
